

ELEMENTS

**&
PRINCIPLES
OF DESIGN**

ELEMENTS OF DESIGN

- Space
- Line
- Shape
- Texture
- Color

INGREDIENTS

of good design

Line

Space

Texture

Shape

Color

SPACE

POSITIVE

VS

**Negative
Space**

SPACE

- **Positive** fills in the space
- **Negative** is un-used space

YOUR TURN!

Be sure
to label!

- **Positive**
fills in the
space

- **Negative** is
un-used
space

LINE

- The outline of an object
- 2 points that are connected

What does line do to a room?

- Directs the eye
- Moves the eye from one place to another
- Separates or unifies
- Creates feeling

YOUR TURN!

Horizontal

Vertical

Diagonal

Curved

TYPES OF LINE

Horizontal

Vertical

Diagonal

Curved

SHAPE

- The solid form or structure of an object.
- Two Dimensional Outline

SHAPE VS. FORM

YOUR TURN!

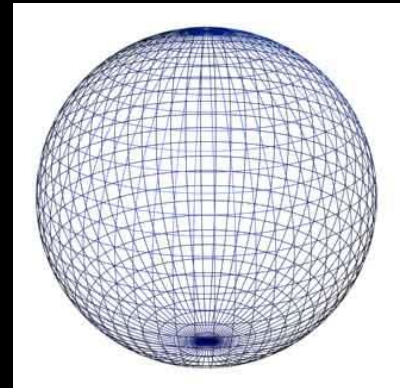

A circle is a shape.

A square is a shape.

A sphere is a form.

A cube is a form.

TEXTURE

- The way an object feels and looks.
- May be rough, smooth, shiny, hard, soft, etc.

YOUR TURN!

- Think of 3 different textures that are common in interior design. Write these down in the boxes.

COLOR

- One of the most important elements.
- Influences a room's: shape, size, feeling, and mood.

YOUR TURN!

- Think of colors that make you feel the following moods:

- **HAPPY?**
- **CALM?**
- **ANGRY?**

PRINCIPLES ARE THE **RULES** USED TO
CREATE A PLEASING DESIGN

- Unity
- Scale
- Balance
- Rhythm
- Emphasis
- Proportion

The principles
are how you
decide to put
all the
ELEMENTS
together!

UNITY

- The appearance of all parts seeming to belong together.
- The room is seen as a whole, not as a collection of unrelated things.

WHAT IS SCALE?

- The size of an object in relation to other objects, the space it is in or to a standard or familiar size.

Which lamp is the best scale for this end table?

A

B

C

A

Which chair is the better scale for the sofa?

B

Because homes and furniture are built for humans, it is important to use the human figure in evaluating their scale.

Rooms and furnishings should be designed or selected for the people who will use them.

BALANCE

- The feeling of equality or equilibrium.
 - Occurs when the amount, size, or weight of objects on both sides of a center point seems equal.

FORMAL BALANCE - SYMMETRICAL

Achieved through the placement of identical objects on both sides of a central point.

INFORMAL BALANCE - ASYMMETRICAL

Achieved through the placement of different, but equivalent, objects on both sides of a central point.

YOUR TURN!

- Draw an example of the two types of **BALANCE**:

- **SYMMETRICAL**
- **ASYMMETRICAL**

RHYTHM

Leads the eye
from one part of
design to
another.

EMPHASIS

■ The center of interest
or attention.

■ Focal Point

YOUR TURN!

What is the focal point
in the illustration?

PROPORTION

The ratio of one part to another part or one part to the whole.

How parts fit together to make a **WHOLE**.

EXAGGERATION OF THE ELEMENTS AND PRINCIPLES CAN BE USED TO MAKE AN IMPACTFUL FEELING

Line/Rhythm

Color/Emphasis

Texture

Shape

Proportion: Is this a normal proportion for a chair?

Balance: Symmetrical

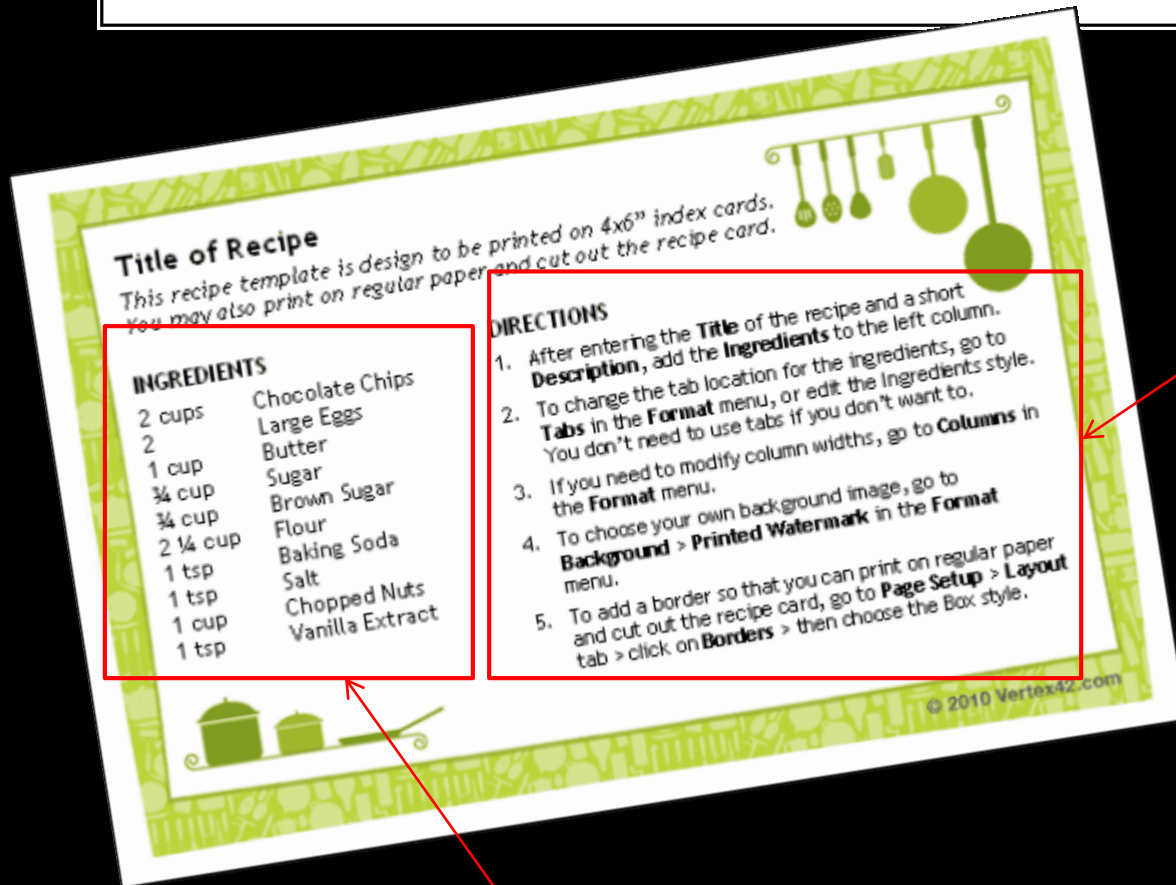

HARMONY

- When all the design elements have consistency of style.
- A pleasing accord between the use of unity and variety and Elements & Principles.

JUST A REVIEW

Principles of Design

Questions to Consider

Would the ingredients of a recipe be good by themselves? Could you follow recipe directions without ingredients?

Elements of Design

LEARNING ACTIVITIES

Principles of Design

Scavenger Hunt

- Go around the room and find the picture that best matches the principle of design.

Elements of Design

- Finish your packet so you can remember all of the elements of design.
