

The new food “Pyramid”

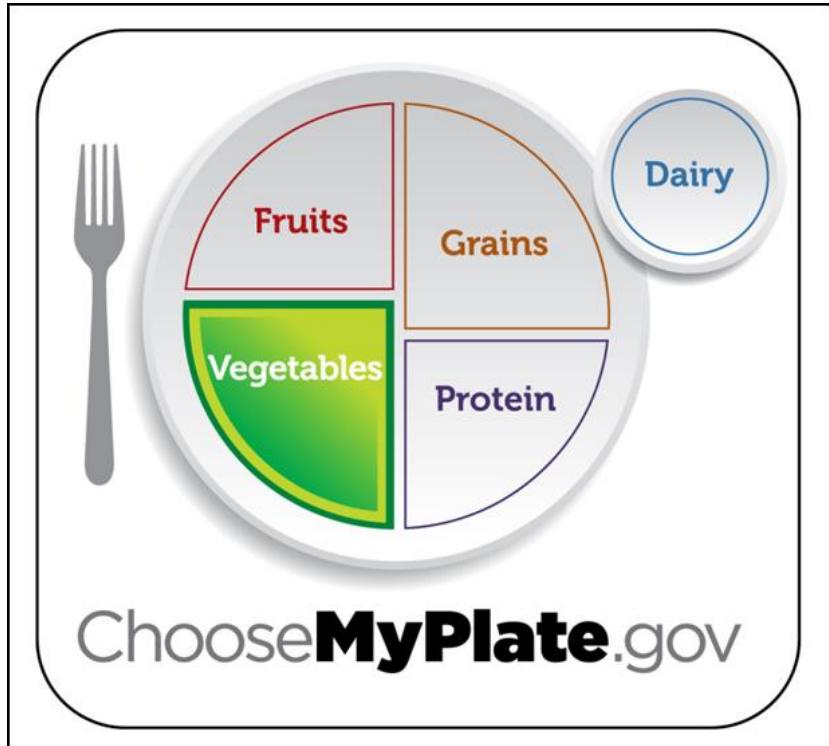

Fruits

- Fresh fruit is the best choice but dried, frozen, canned, or 100% fruit juice is also great.

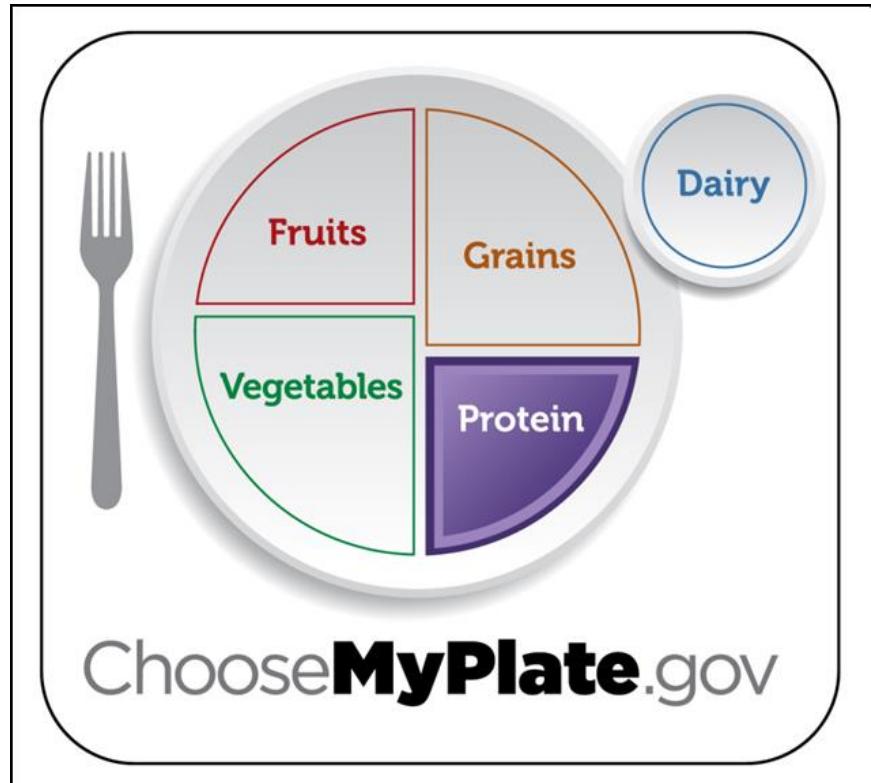

Vegetables

- Eat red, orange and dark green vegetables.
- Make $\frac{1}{2}$ your plate fruits and vegetables!

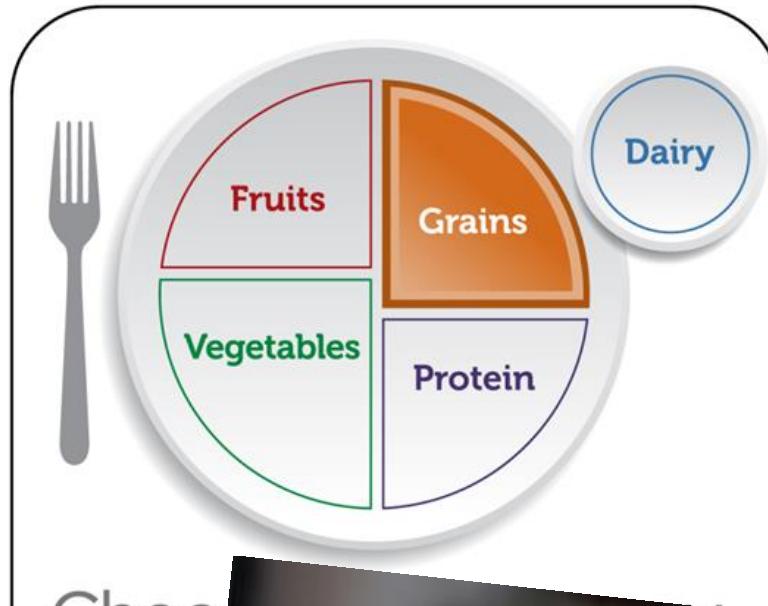

Protein

- Keep meat and poultry portions small and lean.

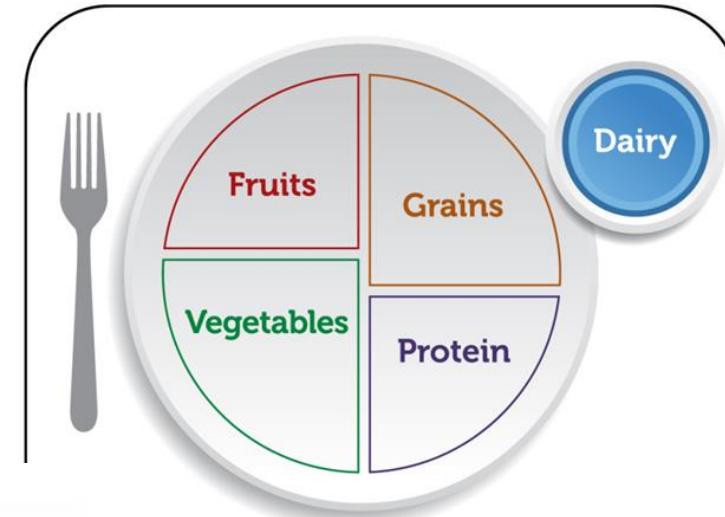

Grains

- Make half your grains whole grains.

Dairy

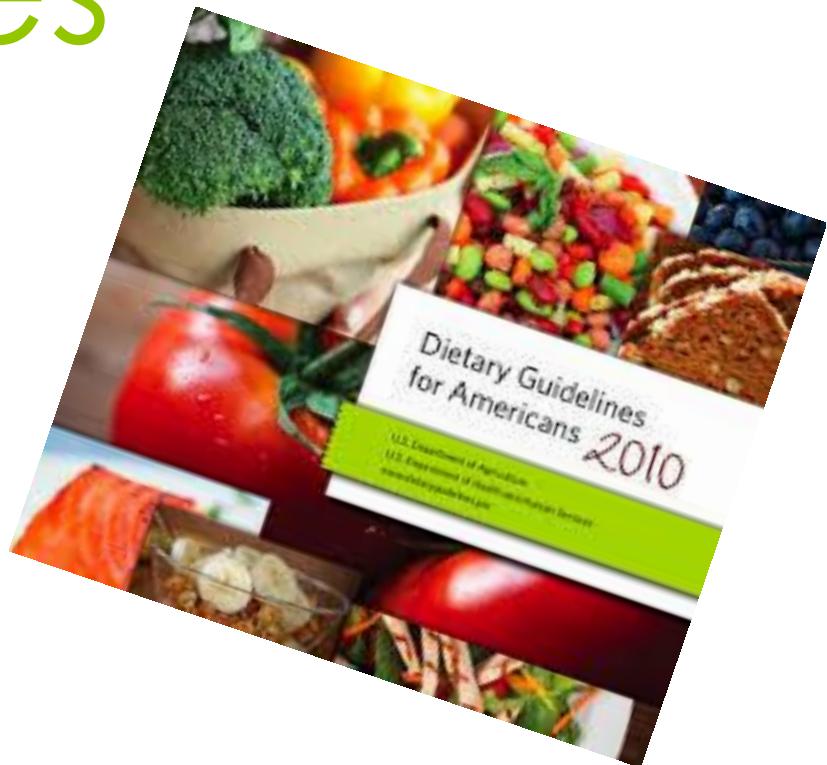

- Switch to fat free milk and get your calcium rich foods.

Is it always going to look like this?

6 Dietary Guidelines

1- Eat **NUTRIENT DENSE** foods

- Choose foods that are high in nutrients instead of foods that have a lot of **EMPTY CALORIES.**

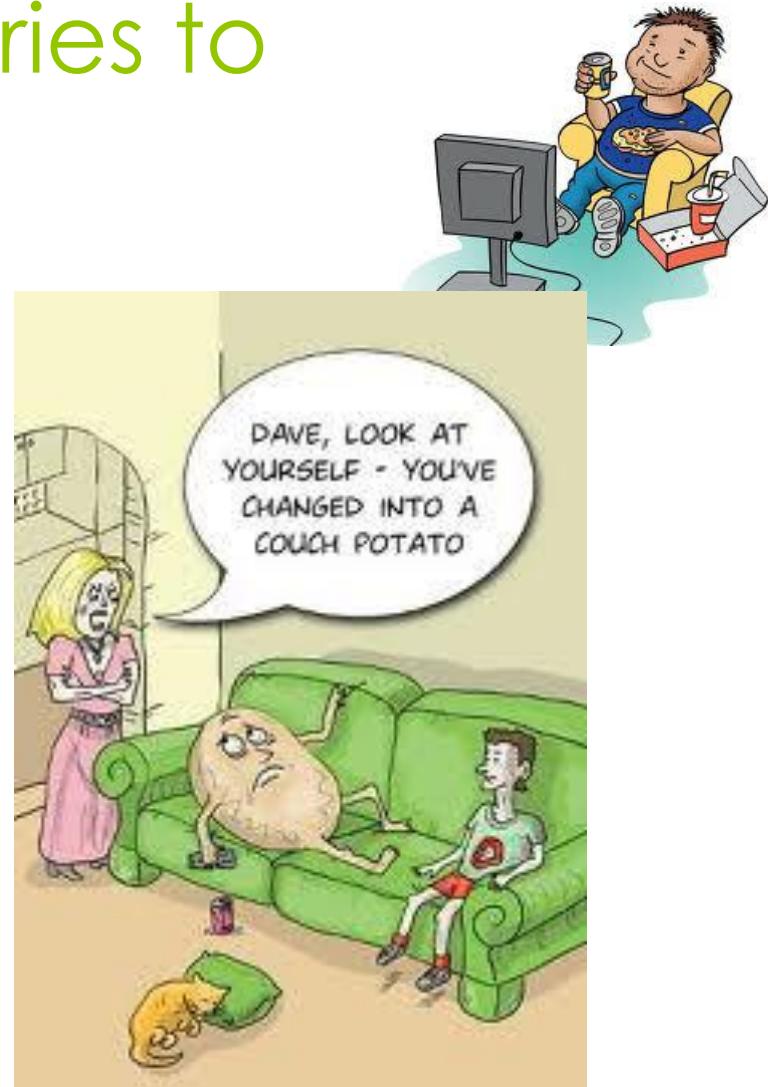

OR

2- Balance Calories to manage weight

- If you're inactive, you have fewer allotted calories.
- If you're active, you burn more calories so you can eat more.

3- Reduce sodium, fats and added sugars, refined grains and alcohol

- These include processed foods, junk foods, white breads and pastas...

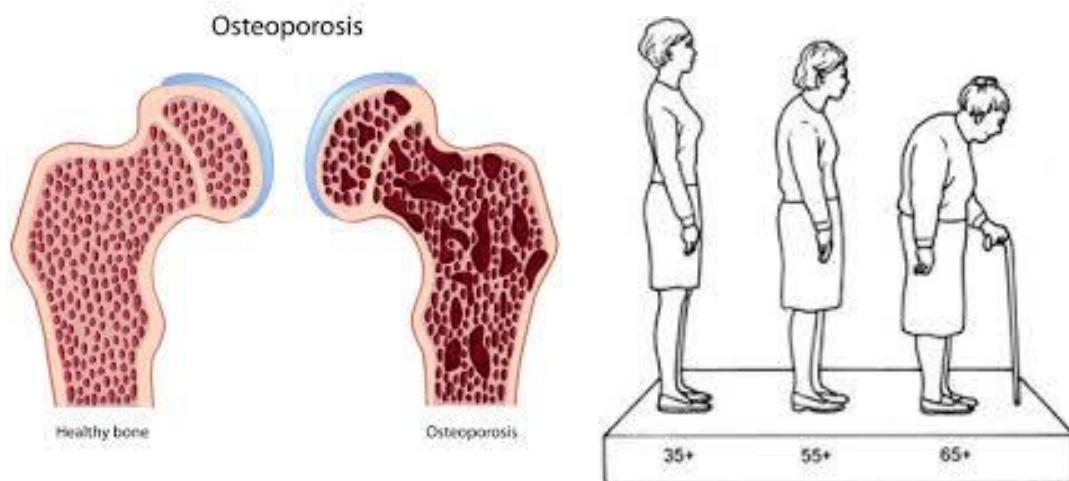

4- Increase vegetables, fruits, whole grains, milk, seafood, and use oils in place of solid fats

- In other words, increase your consumption of **nutrient dense** foods!

5- Build healthy eating patterns that meet nutritional needs over time at an appropriate calorie level.

- Realize that the habits you make now haunt you in the future...

6- Include physical exercise as part of healthy eating patterns.

- 6-17 year olds should be active at least 60 minutes or more each day.

10-Tips to a Healthy Life!

1. Balance your plate
2. Enjoy your food, but eat less
3. Avoid oversized portions
4. Savor healthy foods to eat more
Vegetables, Fruits, Whole
Fat-free dairy products
5. Make half your plate
vegetables

Tips for a healthy diet

6. Switch to low fat (1%) milk
7. Make half your grains whole grain
8. Eat more of foods that are high in fat, salt, or added sugar (like added salt, sugar, or oil)
9. Compare sodium in foods from labels like "low sodium" or "no salt added"
10. Drink water instead of sugary drinks
